SUMMARY

I'm an aspiring content design and brand experience leader, driven by my curiosity and the “whys.” I have the unique combination of being an engineer-creative-designer with experience in scaling brands and working in fast-paced large organizations. I'm also a multilingual with much experience in adapting to new environments and systems.

Technical skills: Storytelling, Content Design & Strategy, Writing, Multimedia Content Development, Branding, EdTech content

Tools: Figma, Google Suite, Gemini, Microsoft 365, Copilot, Canva, Mailchimp, Wix/Squarespace/Wordpress, Adobe Premiere Pro, Riverside, Figma, Framer, Dall-E, Firefly, ChatGPT

PROFESSIONAL EXPERIENCE

Content Designer | July 2024 – Present

Microsoft Security, Redmond

Highlights: Launched multiple high-stakes impactful products and features in a very technical and competitive space. Built content systems for maintaining quality and scaling. Use AI to accelerate content and its impact across multiple product areas.

- Content strategy & AI innovation

I'm leading content design for the launch of Data Security Investigations, an AI-powered investigation tool that helps global organizations proactively manage data risk and respond to breaches. This work includes continuous user research and testing, terminology strategy, concept and information architecture mapping, and finally, surface-level content to elevate user experience.

- Systems-thinking & scale

I partner with product design and research, product management and engineering, and marketing teams to unify product voice and improve user comprehension across multiple security solutions, with my work. In parallel, I create strategic content for feature releases and continuous UX quality improvement of eDiscovery, a high-impact legal investigation tool. To scale the impact of content design across more solutions, I use my content strategy packaged with the Security team's vast knowledge base, to inform our cutting-edge tools to empower our partners

- Terminology & quality management

To engage in inclusive content practices that reflect diverse user perspectives. As part of this effort, I developed and refined terminology for the high-impact Sentinel data lake solution areas, ensuring terminology coherence to maintain brand experience and support business growth. Alongside receiving accessibility and Responsible AI training, I work on content patterns to support Microsoft's 'Secure by Design' principles.

People Communications and Employer Branding Specialist | January 2021 – August 2022

[Ather Energy](#), Bengaluru (Electric Vehicle manufacturer)

Highlights: **Content design** for [Ather's careers website](#) to improve usability, brand alignment and clarity; **UX Writing** for **Ather's Mobile App**, Wrote Ather's new joiner's handbook; Drafted the employer brand book; Content creation and management for LinkedIn, intranet, and other corporate comms channels

- Strategized and launched several **internal communications, talent acquisition, and employer branding projects** in collaboration with stakeholders from design, marketing, engineering, business, and operations teams

- **Simultaneously managed multiple content platforms** to publish content for the intranet, LinkedIn, emails, event collaterals, tech blogs, culture-centric PR articles, and thought leadership pieces for CXOs in **multimedia formats** (social posts, videos, podcasts, articles, interviews, physical collaterals, merch, copy, microcopy, etc.)
- Increased employer brand engagement on LinkedIn, resulting in a **500% audience growth** from 75,000 to 300,000, and improved **intranet engagement by 200%** over my tenure
- Devised **creative storytelling strategies** to increase interest in HR lifecycle activities such as referral programs, performance reviews, pay revisions, DEI and L&D programs, and critical policies, with a strong focus on **organizational culture and values**
- Integral part of establishing Ather's People Communications and Employer Branding teams, and built strong cross-functional collaboration channels across the organization, to create content streams
